

DESIGNED SPECIFICALLY TO MEET YOUR INDIVIDUAL LOGISTICS NEEDS

Our Service offering Total Logistics and Supply Chain Management Solutions includes...

Tailor Made Portfolios
Right service providers at the right price.

Supplier Management
Continued monitoring of Purchase Orders
Exception reporting.

3rd and 4th Party Managed Solutions
Combining in-house and external suppliers to create "Best Practice".

End to End Supply Chain
Incorporating Purchasing, Manufacture, transport and final delivery.

Partnership Approach
Independent extension of your business.

Contract Management
Seamless operations. Performance reports.

Shipping Documentation
All completed and processed by our experts.

'Class A' Bonded Warehouse
Postponing duty and taxes until the sale of goods is completed.

SPATIAL DESIGN SOLUTIONS offers our clients a managed end to end supply chain function incorporating the appropriate external or internal "best practice" suppliers.

We are able to monitor, organise and deliver the right solutions for your business from the creation of the Purchase Order to the final delivery destination.

Our systems provide reports and management information to allow our clients to watch their inventory levels closely and to make decisions accordingly. International tracking and website access gives real time information.

Our aim is to work as an extension of your business giving up to the minute information on product flows and advice on potential global sourcing issues.

WORLDWIDE SUPPLY CHAIN SOLUTIONS

For Individual Solutions to Your Logistics Needs

ORIGIN MANAGEMENT

An inclusive service that sends your consignments on their way, with all of the attention to detail needed to guarantee a successful delivery. Supplier collections, customs brokerage, consolidation services and specialist value-added services are all available options.

WORLDWIDE FREIGHT FORWARDING AND MANAGEMENT

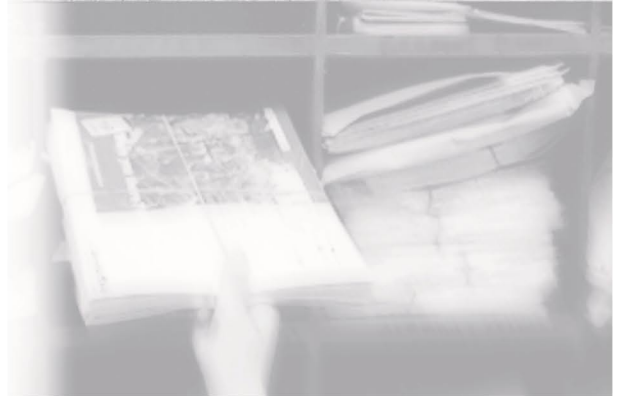

There are several ways to transport your shipments, but only one that is best for your specific requirements. Identifying the method that best suits the bulk, the budget and the urgency of your consignment is only part of the Spatial Design Solutions remit. Our expertise extends to air, sea or road, via major routes or to remote destinations, with courier and international mail options, where required.

DESTINATION MANAGEMENT

It is probably fair to say that the last ten percent of your consignment's journey is the most critical if your goods are to arrive on time and you are to receive prompt payment. Customs or demurrage irregularities, de-consolidation problems, or a failure in port-to-final-destination transport, are all potential pitfalls that the Design Solutions team are trained to anticipate and neutralize. And we will gladly arrange storage, warehousing, pick-and-pack and multi-address distribution, for that truly comprehensive solution.

Supply Chain Visibility and Management

Even in a managed scenario, certain information on the progress of your shipments or warehouse stock levels is imperative to other disciplines within your business. That is why we consider operational transparency to be just as important to our clients as our operational efficiency. Purchase order and product tracking, exception management, planning and forecasting, inventory management and management reports are all available for you to assess and react to for the improved efficiency of your business.
