GROUP

STRATEGICALLY LOCATED WAREHOUSING

For Individual Solutions to Your Storage Needs

STORAGE

Our multi-user facilities are monitored via security systems and create the ideal environment for safe storage of all products. Clients are given absolute discretion on the amount of space they require, on a pay-as-you-use-it basis.

We work with our clients to implement specific storage systems and procedures to cater for any bespoke requirements. All services are provided in accordance with ISO or other accreditation bodies.

CLASS 'A' BONDED WAREHOUSE

Spatial currently operate two bonded facilities to the benefit of all of our customers.

Shipments are cleared into the bonded facility and held in a secure, customs controlled area. All stock movements in and out of the facility are controlled via Spatial Logistics, who electronically bar code all items to ensure complete control and peace of mind for all parties.

By utilising our bonded facility, we offer the ability to delay duties and taxes until a sale is completed. With peak season charges and increasing capacity issues on inbound vessels, it makes operational sense to bring your shipments into the UK and hold them centrally; ensuring quick delivery to your customers once a sale is made.

PICK & PACK OR KITTING AND SORTING?

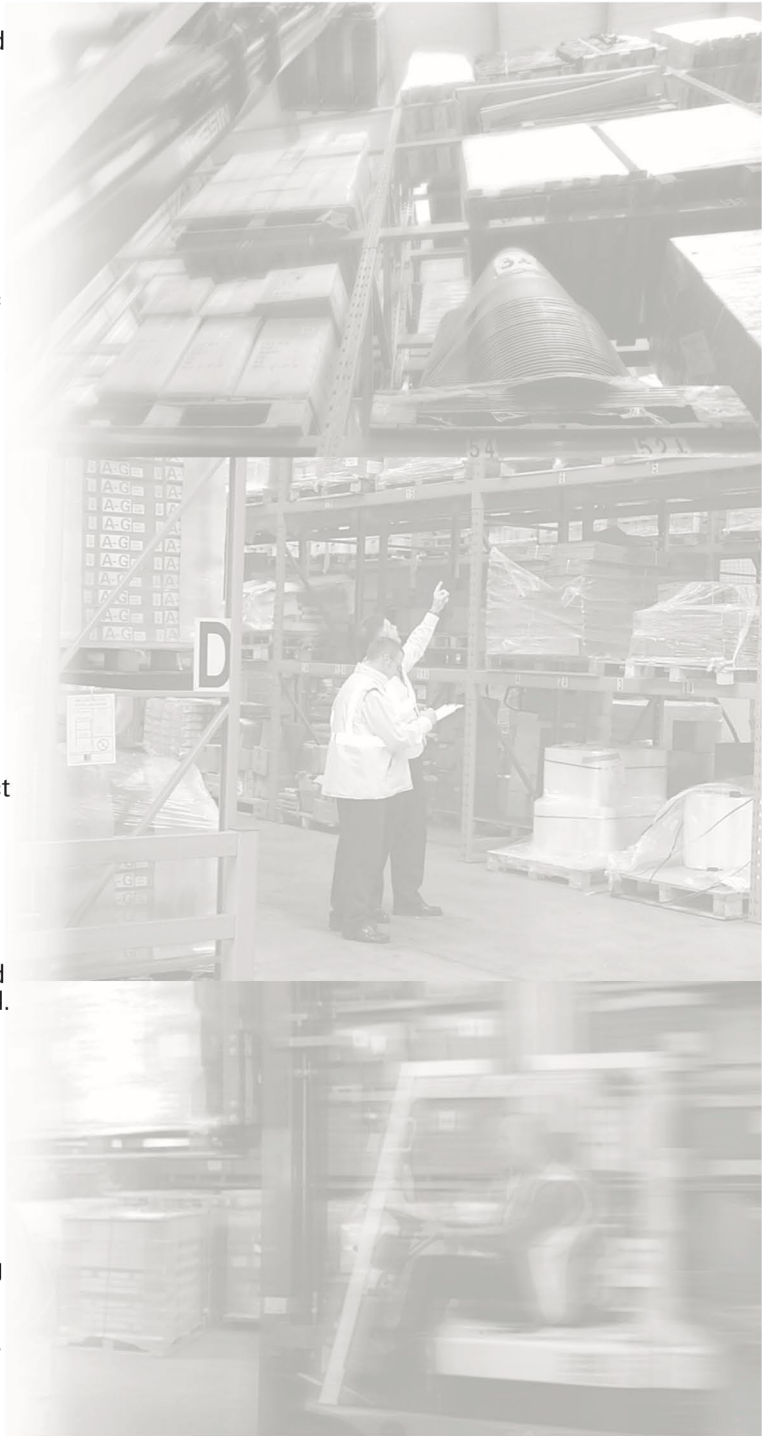

Many of our clients require some form of value added service for their goods while they are stored. These range from product kitting and sorting, to physical alterations to the product. Picking & packing into a specific unit is a popular option, and experienced operational staff, proficient in that activity, supervise all functions.

INVENTORY MANAGEMENT

All products moving in and out of the warehouse are monitored and reported and any changes in product status are also noted. Clients can utilise our in-house systems, or establish their own network for data collection, either option will allow constant inventory management. With password protected stock lists always available on line, our clients can manage their stock to their best advantage.

UK & WORLDWIDE DISTRIBUTION

Our facilities are utilised as a storage and consolidation point for inbound products requiring domestic distribution within the UK, or for outbound products that may require specific packing and distribution internationally. Our in-house post, Courier and freight services, together with managed third-party suppliers, provides our clients with the complete package and an end-to-end managed solution.

For further information on these services, call 01332 815402, or visit us on line at www.the-spatial-group.com
